Summary

Fill in the blanks with the words.

healthy	dairy	energy	fiber	vitamins
---------	-------	--------	-------	----------

Food gives us energy. It is like fuel for a car. We need it to make us go and grow. When we eat food, it goes into our stomachs. There it gets turned into fuel. To be healthy, we should eat four groups of food. One group is fruits and vegetables. They are full of vitamins and iron. Another group is grains like bread and pasta. They have fiber in them. Protein is another group. That is food like meats and eggs. These foods are good for your muscles. Dairy is the last group. This is food like milk and cheese. It is good for your bones and teeth. Some foods can be bad. They have too much fat. To be healthy you should not eat them. But you should eat food of many different colors. This helps your body get all the things it needs.
