Is it Male or Female?

Step 3. Summary

Complete the summary of the story.

feathers	peacocks	mane	grasshoppers	cubs	male
----------	----------	------	--------------	------	------

Julie is interested in animals. She wanted to know how to tell if an animal is (1) male or female. She learned that lion (2) cubs look the same. When they grow up, male lions have a (3) mane. Female lions have no mane. There are many male and female birds that look different, like (4) peacocks and parrots. Male peacocks have very colorful (5) feathers. But many insects like ants and (6) grasshoppers look the same. We have to look at animals very carefully to tell who is male and who is female.
